Online Training:

Shooting Incident Investigations: Facts and Fundamentals not Typically Covered in Training

Date: November 9, 2023

Time: 1:00pm-2:00pm Eastern • **Registration Fee:** \$150

Shooting incident investigations and reconstructions are increasing in frequency. Shooting scenes can involve homicide, suicide, or accident/unintentional discharge. The manner in which the shooting scene is documented can provide valuable information that will assist in determining the manner in which the shooting occurred.

This training is a follow up to the Firearms Evidence webinar and will focus on trajectory of fired bullets as well as the recovery of ballistic evidence at the scene.

Shooting scene evidence such as the location of ejected cartridge casings, recovered projectiles, and documented projectile strikes will become important to the shooting scene investigation. This type of evidence is generally small and not always readily apparent, therefore it may be missed or unintentionally disturbed if proper steps are not taken immediately upon arrival at the scene. The role of the first responding officer on scene is extremely important and it will be necessary for that officer to properly document and safeguard the appropriate ballistic evidence.

This training is designed for anyone who will either be investigating a shooting scene, or may be the first responder to a shooting scene, including police officers, death scene investigators, and crime scene technicians.

Instructor: Tom Martin, Senior Investigator, New York State Police, (retired)

Tom Martin began his law enforcement career in 1988 as a uniformed New York State Trooper, and began his forensic career in 1990 as a crime scene field technician. For the majority of his career, Tom was assigned to the NYSP Forensic Identification Unit in Poughkeepsie, and supervised that unit for 14 years before retiring from that position in October 2010. Tom regularly provides forensic testimony in various state and federal courts.

Tom has a B.S. degree in Criminal Justice. He is a nationally recognized speaker who has instructed at numerous forensic training seminars across the United States, including the American Academy of Forensic Sciences Annual Conferences, The National Institute of Justice Annual Conferences and Technology Fairs, and the Smithsonian Institute. He is a faculty member of the National College of District Attorneys.
